

### Dimensions

24VDC

## 8MM 24V 120° LED STREIFEN FLEXIBEL

SKU: JN210208

## ZUSÄTZLICHE INFORMATIONEN

|                          |                                            |
|--------------------------|--------------------------------------------|
| Typ des LED Streifens    | <a href="#">Standard flexibel</a>          |
| LED Typ                  | SMD2835                                    |
| Eingangsspannung         | 24V                                        |
| Abstrahlwinkel           | <a href="#">120°</a>                       |
| LED / Meter              | 210 LED                                    |
| Farbtemperatur           | 2700K/ 3000K/ 4000K/ 5000K/ 6500K          |
| Leistung (W/M)           | 20                                         |
| Pitch (mm)/ Trennbarkeit | <a href="#">32.33</a>                      |
| Streifen Breite (mm)     | 8                                          |
| Lumen/M                  | <a href="#">2100</a>                       |
| Lumen/W                  | 105                                        |
| CRI                      | 80                                         |
| Control                  | Dotless when used inside aluminium profile |
| IP Schutzart             | IP20                                       |
| mA/LED                   | 60mA                                       |
| LED Reihe                | Single row                                 |
| SKU                      | JN210208                                   |
