

#### Dimensions

## 10MM 12V 120° LED STREIFEN FLEXIBEL

SKU: JN60110

## ZUSÄTZLICHE INFORMATIONEN

|                             |                                   |
|-----------------------------|-----------------------------------|
| Typ des LED Streifens       | <a href="#">Standard flexibel</a> |
| LED Typ                     | SMD2835                           |
| Eingangsspannung            | 12V                               |
| Abstrahlwinkel              | <a href="#">120°</a>              |
| LED / Meter                 | 60 LED                            |
| Farbtemperatur              | 2700K/ 3000K/ 4000K/ 5000K/ 6000K |
| Leistung (W/M)              | 13                                |
| Pitch (mm)/ Trennbarkeit    | <a href="#">50</a>                |
| Streifen Breite (mm)        | 10                                |
| Lumen/M                     | <a href="#">1209</a>              |
| Lumen/W                     | 93                                |
| CRI                         | 80                                |
| Max. Länge pro Streifen (m) | 5                                 |
| IP Schutzart                | IP20                              |
| mA/LED                      | 60mA                              |
| LED Reihe                   | Single row                        |
| SKU                         | JN60110                           |
