

R G B W  
Red Green Blue White

## Dimensions

12VDC

# 12MM 12V 120° LED STREIFEN FLEXIBEL

SKU: JN60112-RGBW

## ZUSÄTZLICHE INFORMATIONEN

|                             |                                                    |
|-----------------------------|----------------------------------------------------|
| Typ des LED Streifens       | <a href="#">RGBW</a>                               |
| LED Typ                     | SMD5050                                            |
| Eingangsspannung            | 12V                                                |
| Abstrahlwinkel              | <a href="#">120°</a>                               |
| LED / Meter                 | 60 LED                                             |
| Farbtemperatur              | Rot/ Grün/ Blau/ Weiß/ Mixed                       |
| Leistung (W/M)              | 2.4W (Rot/ Grün/ Blau), 7.2W (Weiß), 14.4W (mixed) |
| Pitch (mm)/ Trennbarkeit    | <a href="#">100</a>                                |
| Streifen Breite (mm)        | 12                                                 |
| Lumen/M                     | <a href="#">763</a>                                |
| Lumen/W                     | 53                                                 |
| CRI                         | /                                                  |
| Max. Länge pro Streifen (m) | 5                                                  |
| IP Schutzart                | IP20                                               |
| mA/LED                      | 60mA                                               |
| LED Reihe                   | Single row                                         |
| SKU                         | JN60112-RGBW                                       |
